NIRIKSHAK AI

Automated Packaged-Commodity Compliance Examination

PRODUCT LABEL COMPLIANCE & EVIDENCE REPORT

Under the Legal Metrology Act, 2009 and Packaged Commodities Rules, 2011; the Drugs and Cosmetics Act, 1940 and Rules, 1945; with cross-examination under the Food Safety and Standards Act, 2006

Subject of examination	**Oral Rehydration Salts I.P. - Orange Flavour** (ORS), 22.2 g sachet, product code OR0302
Batch / Mfg / Expiry	KHW26077 / 02/2026 / 01/2028
Report reference	NAI/CR/2026/0418AD28
Scan identifier	`0418ad28-b544-4486-9026-da922113418e`
Date of report	24 October 2026
Examination basis	Two label panels (front, back) processed by OCR; evidence dataset hash-sealed (Section 9)
Report status	**UNSIGNED DRAFT** - becomes an operative report only on examiner certification (Section 11)

OVERALL OUTCOME	**LARGELY COMPLIANT - 11 of 13 statutory label checks satisfied; 2 items require physical verification.** No contraindicating non-conformity identified on the evidence supplied. Composition conforms to the W.H.O. reduced-osmolarity ORS formula.

This report records an automated label examination. It is not a laboratory analysis of the product, and it does not replace the findings of a Drug Inspector, Food Safety Officer, Legal Metrology Officer, or an accredited laboratory.

1. DOCUMENT CONTROL

Report reference	NAI/CR/2026/0418AD28
Version / status	v1.0 - Unsigned draft
Prepared by	Nirikshak AI automated examination engine
Examiner / certifying person	_____ (name, designation, ID - to be completed)
Scan timestamp	____ / ____ / 2026 __:__ IST (not present in data supplied; to be completed from device log)
Capturing device / operator	_____ (to be completed)
Place of capture	_____ (to be completed)

2. EXECUTIVE SUMMARY

The examined article is a single-use sachet of **Oral Rehydration Salts I.P.** (orange flavour), net quantity **22.2 g**, manufactured by Halewood Laboratories Pvt. Ltd., Bavla, Gujarat, and marketed by JNTL Consumer Health (India) Pvt. Ltd., Mumbai. The pack is labelled as an Indian Pharmacopoeia (I.P.) product and carries a manufacturing-licence number, i.e. it presents as a **drug** and not as a food product.

Of 13 label checks derived from the Legal Metrology (Packaged Commodities) Rules, 2011 and Rule 96 of the Drugs and Cosmetics Rules, 1945, **11 were satisfied** and **2 were not confirmed** from the evidence: (i) the statement that the M.R.P. of Rs. 23.54 is inclusive of all taxes was not detected, and (ii) excipients / flavouring are declared only as "q.s." without itemisation. The declared electrolyte profile (Na 75, Cl 65, glucose 75, K 20, citrate 10; total 245 mOsmol/L) was independently recomputed from the declared masses and agrees with the W.H.O. reference formulation (Section 6).

Outcome	Count	Meaning
PASS	**11**	Requirement located on the pack and consistent between panels / with arithmetic.
REVIEW	**2**	Requirement not confirmed from evidence; physical verification recommended.
INFO	**3**	Observations that are not non-conformities (Section 8).

3. APPLICABLE LEGAL FRAMEWORK AND APPLICABILITY DETERMINATION

Instrument	Relevance to this article	Applied?
Legal Metrology Act, 2009 (s. 18) and **Legal Metrology (Packaged Commodities) Rules, 2011** (Rule 6)	Mandatory declarations on pre-packaged commodities: manufacturer / packer, common name, net quantity, month and year of manufacture, M.R.P. inclusive of all taxes, consumer-care details.	**PASS**
Drugs and Cosmetics Act, 1940 and **Drugs and Cosmetics Rules, 1945** (Rule 96 - manner of labelling)	Governs ORS formulations labelled I.P. Requires name of drug, composition, batch number, manufacturing and expiry dates, licence number, manufacturer's name and address, and storage / caution matter.	**PASS**
Food Safety and Standards Act, 2006 (ss. 23, 24 - packaging, labelling, misleading claims); FSS (Labelling and Display) Regulations, 2020; FSS (Advertising and Claims) Regulations, 2018	Not the governing regime for a drug-licensed article. Examined as a cross-check because FSSAI orders of 14-15 Oct 2025 prohibit use of "ORS" on food and beverage labels (Section 7).	**INFO**
Bharatiya Sakshya Adhiniyam, 2023 (ss. 61-63 - electronic records)	Governs admissibility of the electronic record and this report; a s. 63 certificate is provided at Annexure A.	**INFO**

Determination. The product is examined principally under the Legal Metrology and Drugs and Cosmetics regimes. The Food Safety and Standards Act is applied only as a cross-check to confirm the article is not a mislabelled food.

4. IDENTIFICATION OF THE SUBJECT ARTICLE

Product name (as printed)	ORAL REHYDRATION SALTS I.P. - ORANGE FLAVOUR [Exhibit E-1, B-04, B-05]
Brand line (as printed)	"ORS"; "FROM THE MAKERS OF ORSL" [E-1, B-01 to B-03]
Product code	OR0302 [E-1, B-06]
Pharmacopoeial status	I.P. (Indian Pharmacopoeia) - "W.H.O. RECOMMENDED FORMULA" [E-1, B-10, B-11, B-13]
Pack / net quantity	Single sachet, 22.2 g [E-1 B-12; E-2: "Each sachet (22.2 g)"]
Batch number	KHW26077 [E-2]
Manufacturing date	02/2026 [E-2]
Expiry date	01/2028 [E-2] - shelf life 24 months; not expired on date of report (approx. 15 months remaining)
M.R.P.	Rs. 23.54 per sachet [E-2]
Manufactured by	M/s. Halewood Laboratories Pvt. Ltd., Industrial Park (Rupal), Plot No. 10, Unit 27, Tal. Bavla, Dist. Ahmedabad - 382220, Gujarat, India [E-2]
Manufacturing licence	Mfg. Lic. No. G/25/2711 [E-2] (format appears consistent with a Gujarat State Licensing Authority licence; **not verified** against licensing records)
Marketed by	JNTL Consumer Health (India) Pvt. Ltd., Office No. 16, Admin Block, Ground Floor, L.B.S. Marg, Mulund (W), Mumbai - 400080, Maharashtra [E-2]
Consumer care	Toll free 1800 228 111; consumer-in@kenvue.com; or write to the "Marketed by" address [E-2]
CPCB registration	Printed as "B0-10-000-03-AAFCJ4887N" - **partially legible** [E-2]
Artwork reference	F/80RAL04-00 (approximate reading) [E-2]

5. STATUTORY LABEL DECLARATION VERIFICATION

Each requirement is tested against the exhibits. "Basis" identifies the governing provision (rule-level citation; clause-level pinpointing is reserved for the certifying examiner).

#	Requirement	Evidence found	Basis	Exhibit	Result
1	**Name / common or generic name of commodity**	Oral Rehydration Salts I.P.	PC Rules r.6; D&C; r.96	E-1	**PASS**
2	**Net quantity**	22.2 g (front and back agree)	PC Rules r.6	E-1, E-2	**PASS**
3	**Month and year of manufacture**	02/2026	PC Rules r.6; D&C; r.96	E-2	**PASS**
4	**Expiry date**	01/2028	D&C; r.96	E-2	**PASS**
5	**Batch number**	KHW26077	D&C; r.96	E-2	**PASS**
6	**M.R.P. amount declared**	Rs. 23.54 per sachet	PC Rules r.6	E-2	**PASS**
7	**M.R.P. stated as inclusive of all taxes**	Wording not detected by OCR	PC Rules r.6	E-2	**REVIEW**
8	**Manufacturer name and address**	Halewood Laboratories Pvt. Ltd., Bavla, Gujarat	PC Rules r.6; D&C; r.96	E-2	**PASS**
9	**Marketer / packer name and address**	JNTL Consumer Health (India) Pvt. Ltd., Mumbai	PC Rules r.6	E-2	**PASS**
10	**Consumer-care details**	Toll-free number, e-mail, postal address	PC Rules r.6	E-2	**PASS**
11	**Manufacturing licence number**	G/25/2711 (presence confirmed; validity unverified)	D&C; r.96	E-2	**PASS**
12	**Composition / quantity of active ingredients**	NaCl 2.6 g, KCl 1.5 g, Na citrate 2.9 g, Dextrose 13.5 g	D&C; r.96	E-2	**PASS**

#	Requirement	Evidence found	Basis	Exhibit	Result
13	**Excipients and flavouring itemised**	Declared only as "q.s."	D&C; r.96 (good practice)	E-2	**REVIEW**

Supplementary label matter present: "NOT FOR INJECTION" (E-1); indications; dose; directions for use; storage ("Store in a dry place"; "Discard the unused solution after 24 hours"); caution for renal impairment, hypertension, diabetes and heart disease, and for severe diarrhoea / critical fluid loss needing parenteral fluids (E-2).

6. COMPOSITION AND W.H.O. FORMULA VERIFICATION

Declared concentrations were recomputed from the declared sachet masses on the basis that one sachet is dissolved in **1 litre** (as directed on the label). Molar masses used: NaCl 58.44; KCl 74.55; trisodium citrate dihydrate 294.10 (assumed form of "Sodium Citrate I.P."); anhydrous dextrose 180.16 g/mol.

Component	Source on label	Declared (mmol/L)	Recomputed (mmol/L)	W.H.O. reference	Result
Sodium	NaCl + Na citrate	75	74.1	75	**PASS**
Chloride	NaCl + KCl	65	64.6	65	**PASS**
Dextrose (glucose)	Dextrose anhydrous	75	74.9	75	**PASS**
Potassium	KCl	20	20.1	20	**PASS**
Citrate	Na citrate	10	9.9	10	**PASS**
Total osmolarity	Sum	245	243.6	245	**PASS**

All six values fall within 3% of the declared figures. The pack's claim "W.H.O. RECOMMENDED FORMULA" is therefore **supported** by the declared composition. Active salts total 20.5 g; the remaining approx. 1.7 g of the 22.2 g sachet (by difference) is excipients / flavour, which the label does not itemise (Finding F-2).

Limitation. This is an arithmetic verification of label declarations. It does not establish that the contents of the sachet actually match the label; that requires laboratory assay of the sample by an accredited laboratory.

7. FOOD SAFETY AND STANDARDS ACT, 2006 - CROSS-EXAMINATION

FSSAI orders dated 14 and 15 October 2025 withdrew earlier permissions and prohibited the use of the term "ORS", alone or with a prefix / suffix, in the name, trade mark or label of any food or beverage product, treating it as misleading under ss. 23 and 24 of the FSS Act read with the FSS (Labelling and Display) Regulations, 2020 and the FSS (Advertising and Claims) Regulations, 2018. The Delhi High Court declined to interfere with that position in interim proceedings (order of 31 October 2025). FSSAI has also directed that WHO-recommended ORS **drug** products, regulated under the Drugs and Cosmetics Act, 1940, are not to be subjected to food-law sampling or seizure.

Test	Observation on this pack	Result
Is the article presented as a food / beverage?	No. Labelled "I.P.", bears a manufacturing-licence number, carries "Not for injection", indications, dose and clinical cautions.	**PASS**
Does composition meet the W.H.O. ORS formulation?	Yes (Section 6). The use of "ORS" is therefore not a misleading food-label use.	**PASS**
Any health / therapeutic claim on a food product?	Not applicable; therapeutic statements are consistent with a drug label.	**N/A**
Brand-line reference to "ORSL"	Printed as "From the makers of ORSL". The FSSAI proceedings concerned food / beverage products using ORS-type names. This pack is a distinct drug-licensed product; the reference is recorded as an observation only (F-3).	**INFO**

Source note: the FSSAI and court positions above are taken from published reports of the orders (File No. RCD-15001/6/2021-Regulatory-FSSAI [E-1475] dated 14.10.2025; order of 30.10.2025; direction of 19.11.2025; Delhi High Court, 31.10.2025). The certifying examiner should annex the primary texts before this report is relied on in proceedings.

8. FINDINGS, OBSERVATIONS AND RECOMMENDED ACTIONS

F-1	**M.R.P. "inclusive of all taxes" wording not detected**	**REVIEW**

Observation: The M.R.P. (Rs. 23.54 per sachet) is declared, but OCR returned the label fragment as "RPP" / "M.R.P..per sachel" and did not capture tax-inclusive wording. Rule 6 of the PC Rules requires M.R.P. to be stated as inclusive of all taxes.

Recommended action: Examine the physical sachet near the M.R.P. line and record the exact wording; re-capture that area at higher resolution.

F-2	**Excipients / flavour not itemised**	**REVIEW**

Observation: Composition lists "Excipients q.s." only. The orange flavour, colour or sweetener, if any, and any allergen statement cannot be assessed from the label.

Recommended action: Obtain the product dossier or manufacturer declaration for excipients if allergen assessment is required.

F-3	**Brand-line reference to "ORSL"**	**INFO**

Observation: The front panel states "From the makers of ORSL". Published FSSAI / court material has addressed ORSL-branded food products. This examination finds the present article to be a drug-licensed, W.H.O.-conformant ORS and makes no finding on any other product.

Recommended action: None required for this article; note for context.

F-4	**Licence number and CPCB registration not independently verified**	**INFO**

Observation: Mfg. Lic. No. G/25/2711 is present. The CPCB registration reads "B0-10-000-03-AAFCJ4887N" and is partially legible.

Recommended action: Verify the licence with the State Licensing Authority and read the CPCB number from the physical pack.

F-5	**OCR transcription irregularities**	**INFO**

Observation: The back-panel text contained fragments such as "Each sach 22.2f RS1", "RPP" and stray numerals ("1022 901012 8 OL TOES"). These were reconciled against clean readings elsewhere (e.g. net quantity 22.2 g confirmed on the front) or treated as print / barcode noise.

Recommended action: Retain the original photographs as the primary evidence; OCR is a secondary aid.

Conclusion. On the evidence supplied, the article presents as a properly labelled, W.H.O.-conformant Oral Rehydration Salts I.P. product. No label-based ground for treating it as misbranded is identified, subject to closure of F-1 and F-2 by physical inspection.

9. EXHIBIT REGISTER AND EVIDENCE INTEGRITY

Exhibit	Description	Type	Status in this report
E-1	Front panel (Panel A) - original photograph	Photograph	**Frame reserved (Annex B-1). Original image was not supplied to the report generator - attach before issue.**
E-2	Back panel (Panel B) - original photograph	Photograph	**Frame reserved (Annex B-2). Original image was not supplied - attach before issue.**
E-3	OCR localisation map, front panel (14 regions)	Derived schematic	Included (Annex C). Drawn from OCR coordinates; not a photograph.
E-4	Front-panel OCR record with confidence scores	Machine record	Included (Annex D). Hash-sealed.
E-5	Back-panel OCR transcript (as supplied)	Machine record	Included (Annex E).

Integrity hash (SHA-256)	`3b9ee714a307c0dac19a208435535fab260a3d006e3d086a50873ffbbaf7c728`
Hash scope	Canonical JSON of the 14 front-panel OCR records (id, text, confidence, bounding box) exactly as reproduced in Annex D.
Hash of E-1 / E-2 originals	_____ (record SHA-256 of each original image file at the time of capture)
OCR mean confidence	96.5% across 14 front-panel regions (range 90.3% - 99.7%)

The hash lets a reader detect any alteration of the Annex D dataset after sealing. A PDF cannot contain its own hash; the examiner should record the SHA-256 of the final signed PDF in the certificate at Annexure A.

ANNEX B - PHOTOGRAPHIC EXHIBITS (TO BE ATTACHED)

The original photographs of the two panels were not provided to this report generator, and none has been fabricated or substituted. Insert the original, unedited images in the frames below, record the file hash, and sign each frame.

Exhibit E-1 / Annex B-1 - FRONT PANEL (Panel A)

[INSERT ORIGINAL PHOTOGRAPH]

File name: _____ Captured: ____/____/2026 __:__ SHA-256: _____ Initials: _____

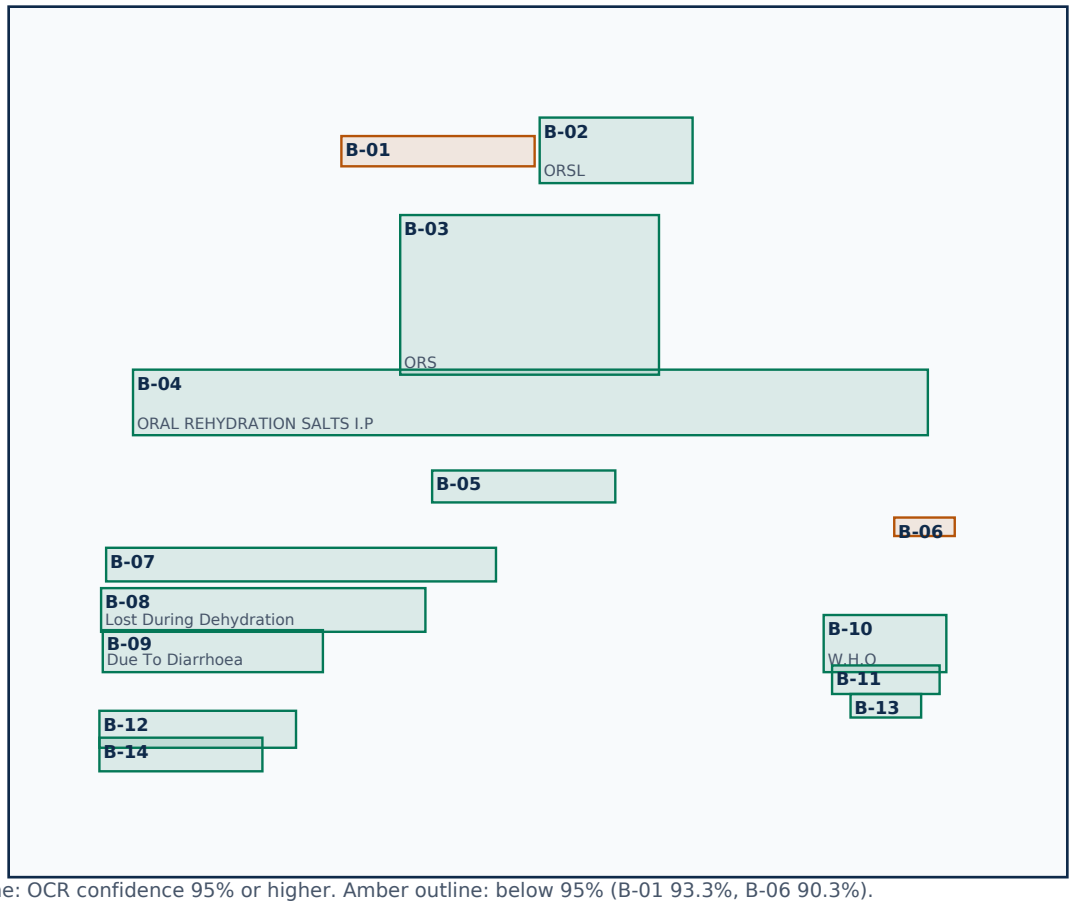

Exhibit E-2 / Annex B-2 - BACK PANEL (Panel B)

[INSERT ORIGINAL PHOTOGRAPH]

File name: _____ Captured: ____/____/2026 __:__ SHA-256: _____ Initials: _____

ANNEX C - OCR LOCALISATION MAP (EXHIBIT E-3)

Schematic reconstruction from OCR bounding boxes on the 630 x 518 px source image. Each box marks where the OCR engine located the numbered text region; it is provided so that each reading can be located on the original photograph (E-1). It is **not** a photograph of the pack.

Green outline: OCR confidence 95% or higher. Amber outline: below 95% (B-01 93.3%, B-06 90.3%).

ANNEX D - FRONT-PANEL OCR RECORD (EXHIBIT E-4)

ID	Text as read	Confidence	Bounding box (x1,y1,x2,y2) px
B-01	FROM THE MAKERS OF	93.32%	198, 77, 313, 95
B-02	ORSL	95.93%	316, 66, 407, 105
B-03	ORS	99.74%	233, 124, 387, 219
B-04	ORAL REHYDRATION SALTS I.P	95.03%	74, 216, 547, 255
B-05	ORANGE FLAVOUR	97.68%	252, 276, 361, 295
B-06	OR0302	90.26%	527, 304, 563, 315
B-07	Restores Fluids & Electrolytes	96.19%	58, 322, 290, 342
B-08	Lost During Dehydration	96.61%	55, 346, 248, 372
B-09	Due To Diarrhoea	96.63%	56, 371, 187, 396
B-10	W.H.O	98.83%	485, 362, 558, 396
B-11	RECOMMENDED	99.51%	490, 392, 554, 409
B-12	Net Contents:22.2g	96.20%	54, 419, 171, 441
B-13	FORMULA	99.34%	501, 409, 543, 423
B-14	NOT FOR INJECTION	95.17%	54, 435, 151, 455

ANNEX E - BACK-PANEL OCR TRANSCRIPT, AS SUPPLIED (EXHIBIT E-5)

Reproduced without correction, in the order received. Line breaks are as received; errors are retained deliberately so that the record is faithful to the machine output.

10. METHODOLOGY, ASSUMPTIONS AND LIMITATIONS

- **Method.** Label text was extracted by OCR from two panel images; fields were normalised, cross-checked between panels, and tested against the requirement list in Section 5. Composition was recomputed arithmetically (Section 6).
- **Assumptions.** "Sodium Citrate I.P." is taken as trisodium citrate dihydrate; the solution volume is 1 litre as directed; OCR readings reconciled in Finding F-5 are correct.
- **What this report does not establish.** Authenticity of the article (genuine vs. counterfeit); actual content, potency or purity; validity of the licence; storage history; or any matter outside the printed label.
- **Scoring.** The 11/13 figure is a label-completeness count, not a quality or safety rating of the product.
- **Not legal advice.** Statutory references are given at rule / section level to orient the reader. Admissibility and weight are for the court or adjudicating authority, and depend on the chain of custody, original images and the certificates in Section 11.

11. EXAMINER'S DECLARATION AND SIGNATURES

I, the undersigned, declare that I have examined the exhibits listed in Section 9, that the findings above accurately record my examination, and that the photographs annexed as E-1 and E-2 are true, unaltered images of the article described.

Examiner	Countersigning authority (if any)
